ENGR 3510 Project

January 30, 2020

The purpose of this project is to design a force transducer for our wind tunnel that is capable of measuring both lift and drag. Other features may be added as desired by the group.

You can add comments with . Make sure to put your initials. It will do weird things to the text; that's fine. Citations are made with **[Dolan2016]** where Dolan2016 could be replaced with any citation key.

1. **[Nan2013]**
